JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

*Sanitary report from Santiago.*SANTIAGO DE CUBA, *September 25, 1897.*

SIR: I have the honor of submitting the following report on the sanitary condition of Santiago de Cuba for the week ended September 25:

Seventy-five deaths were reported for this period, of which, 10 were from yellow fever and 3 from typhoid fever, 2 from dysentery, 12 from enteritis, 5 from remittent fever, 6 from pernicious, 4 from tuberculosis; the rest from noncontagious diseases.

There has been a slight decrease in the death rate of yellow fever this week.

Fifteen thousand soldiers are expected during the month of October to resume active operations against the rebels; this will increase the number of cases.

There are about 900 cases of malarial fevers of all kinds at the military hospital.

Respectfully,

Dr. H. S. CAMINERO,

Sanitary Inspector, U. S. M. H. S.

The SUPERVISING SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NICARAGUA.

*Yellow fever in Leon—Hygienic measures.*MANAGUA, *August 30, 1897.**To the minister of public instruction:*

SIR: The executive committee of the faculty of medicine and pharmacy, at its usual meeting held yesterday, decided, in view of the information given by Dr. A. Soler, that, in his opinion, and that of several physicians in Leon, the disease which has developed in epidemic form in that city is yellow fever, to bring to the notice of the Government the hygienic measures which it judges most opportune to put in practice in this critical situation.

These will be found to be indicated in the communication inclosed.

Very respectfully,

JOSÉ D. MAYOVGA.

[Inclosure.]

1. To organize committees of public health and sanitation in all towns in the State.
2. To appoint a permanent medical inspector at the station of the Leon Railway to prevent persons attacked with yellow fever, or in a state of convalescence from the said disease, from boarding the train, and to enforce, without exception, fumigation of passengers, crew, and freight destined for the interior of the State.
3. To order, promptly and peremptorily, the cleaning of streets, private inclosures, and latrines, and to collect and burn, or inter in a locality removed from the town, all refuse and filth.
4. To order the draining of all pools and marshes in the vicinity of inhabited sections.
5. To order that all public buildings shall be painted or whitewashed internally and externally with as little delay as possible.
6. To order the immediate disinfection of sewers and drains.
7. To establish lazarettos in all localities in which the disease has broken out, obliging all attacked, without discrimination, to be treated in the said establishments.
8. To order the fumigation of all mail correspondence.
9. To order that, on the first suspicion of yellow fever having appeared in any locality, the colleges and schools shall be closed and all large public gatherings shall be prohibited or avoided.
10. To require that the inhumation of the bodies of persons who have died of black vomit shall take place immediately after death, on physician's certificate.
